This report has been prepared for the Office of Naval Research and presents results of an analytical study carried out by a scientific advisory group organized under the auspices of the National Academy of Sciences-National Research Council, Mine Advisory Committee and the Department of the Navy, Office of Naval Research.

Publication has been authorized under terms of Contract Nonr 2300(10) between the Office of Naval Research and the National Academy of Sciences. Reproduction in whole or in part is permitted for any purposes of the United States Government. All inquiries concerning this report or its reproduction should be addressed to the Mine Advisory Committee, National Academy of Sciences-National Research Council, Washington, D.C., or to the Chief of Naval Research, Code 463, Department of the Navy, Washington, D. C.

United States military agencies may obtain copies of this report directly from the Defense Documentation Center. Other qualified users shall request through the Chief of Naval Research, Code 463.

This document contains information affecting the National Defense of the United States, within the meaning of the Espionage Laws, Title 18, U.S.C., Sections 793 and 794, the transmission or revelation of which in any manner to an unauthorized person is prohibited by law.

THIS DOCUMENT CONSISTS OF 11 PRINTED PAGES.

## FOREWORD

Project PEBBLE, a study of mine and mine countermeasures operations in Guerrilla Warfare, was conducted under the sponsorship of the Office of Naval Research, the Advanced Research Projects Agency and the National Academy of Sciences—National Research Council's Mine Advisory Committee during the summer of 1965. In preparation for the Study a library containing approximately 900 documents pertaining to various aspects of the problem was assembled. Based on the recommendation of many members of the Study Group the accession list to this library has been edited and arranged into the form of a bibliography. It does not represent a complete nor a selective listing of the documents relating to mine and mine countermeasures operations in Guerrilla Warfare, but it is perhaps the most complete comprehensive and up-to-date compilation of this particular subject. For this reason, it is being made available to authorized activities.

Further information about any of the documents listed or requests for them should be directed to the source given or to the Defense Documentation Center (DDC), Cameron Station, Alexandria, Virginia 22314.

Lee M. Hunt  
Executive Secretary  
Mine Advisory Committee
